

ABHINAV GUNDRALA

gundralaa@berkeley.edu
(360)-867-3192
gundralaa.github.io

Objective

CS and Cog Sci student with a passion for learning and contributing in the areas of graphics programming, artificial intelligence and computer vision technologies.

Education

University of California, Berkeley

Bachelor's in Computer Science and Cognitive Science

Class of 2023 | Current GPA 3.95

Relevant Coursework

- CS61B: Data Structures
- CS70: Probability, Discrete Math
- EE16A and B: Linear Algebra and Circuits
- CS61C: Computer Architecture
- Cog Sci 1: Cognitive Science

Clubs and Activities

- Neurotech@Berkeley
Developed EEG analysis ML apps.
- Open Computing Facility
Ran Linux Sys Admin tasks and developed backed web framework.

Work Experience

Microsoft | Redmond, WA

Software Development Intern | 06/2018 – 09/2018

Developed Android mobile applications that showcased different Microsoft Cognitive Services APIs such as Computer Vision and Speech Recognition technologies.

Skills

- **Languages:** C, C++, Python, Java
- **Tools:** Git, Linux, Visual Studio
- **Apps:** React, Flask, Android
- **Graphics SDK:** OpenGL, OpenGL Shader Language, Godot Game Engine

Projects

- **Maze Renderer** | github.com/gundralaa/maze_generator
C++ Project using OpenGL to render a 3D maze using a 2D grid input.
- **Professor Piggy** | github.com/gundralaa/prof_piggy
Python NLP Chatbot application using text gen RNN model for monologue.
- **ECG Heart Attack Detector** | github.com/gundralaa/heart_attack_detection
Python signal processing and AI application for classifying heart attack signals.
- **Safe Store** | github.com/gundralaa/safe-store
(Cal Hacks) React Native app for safely distributing customers due to COVID.
